

suitable for large 6-8 inch wall installation speakers with a maximum installation depth of 105 mm!

Description

For brick and concrete walls

The wallboxx has been developed to allow a highly professional installation of in-wall speakers for brick- or concrete walls. Thanks to the front and rear MFP boards, the wallboxx will seamlessly integrate into your installation workflow, enabling a quick and easy processing of the walls surface. The body material is framed by EPS to achieve low resonances and improved sound insulation features.

Features and benefits

- modular and flexible product available in 6 sizes
- front and rear boards are made of MFP boards (15 mm)
- fix cut-outs allow for best possible handling of electronic ductwork (20 mm + 25 mm)
- lightweight and at the same time offers a robust stability with excellent shock absorption features compared to other systems
- our materials deliver a better audio reproduction when compared to other boxes that come in wood, sheet metal or plastic
- better insulation with airborne- and structure-borne noise compared to conventional in-wall systems
- Water absorbing protective lid

Included in delivery (per piece):

- 1 wallboxx L (F-5943)
- 1 protective cardboard lid
- 1 installation manual
- 1 cardboard packaging

Type	wallboxx L (F-5943)
Item number	10141
Dimensions	590 × 435 × 120 mm (L × W × H)
Depth	105 mm
Cut-Out-Dimensions	max. 470 × 315 mm (L × W)
Internal Volume	17,00 l
Fire protection class	B1
Pallet unit	28 Pieces
